Integrity...  
the foundation  
of every project

# Willow Construction

In 1973 Willow Construction broke ground on our first building site; thus began a reputation built on time-honored values – quality, stability, and honest relationships with people and with the land. Since that time, Willow Construction has grown to become one of the largest and most respected commercial and industrial construction companies on Maryland’s Eastern Shore.

Incorporating the latest engineering and construction technologies along with exceptional service and expertise, the Willow team operates at peak levels of productivity and professionalism. From retail and office space to municipal and heavy industrial projects, Willow

Construction delivers on schedule, on budget, and with the highest quality workmanship of any construction company around.

Whether bid market, negotiated contract, or design build, Willow Construction coordinates the needs of each individual client to continually produce outstanding, award winning projects. Customer satisfaction and superior construction is our investment in the future. That’s why at Willow Construction, we build the best, time and time again.
