Integrity...  
the foundation  
of every project

## Willow Construction Pre-engineered Buildings

Willow Construction, LLC. is an independent design/build contractor for Butler pre-engineered metal buildings. Butler, a worldwide leader in comprehensive building systems design and manufacturing, offers an integrated approach to construction. Precision fabrication of excellently engineered construction components ensures a perfect fit and uniform high quality in all their pre-engineered products.

Whether for storage, manufacturing, and even for retail or commercial use, Willow Construction coordinates the needs of each individual client with the Butler structure best suited to the project.

Pre-engineered metal buildings are an economical alternative to conventional buildings, saving on planning time and custom engineering costs while providing an attractive exterior with unlimited design alternatives.

Finding the right resource for your construction needs – pre-engineered metal buildings are about flexibility and options. Let Willow's signature service and construction expertise guide you in the right direction.
